

# Connect to MySQL with MySQL Workbench

## Databases > MySQL

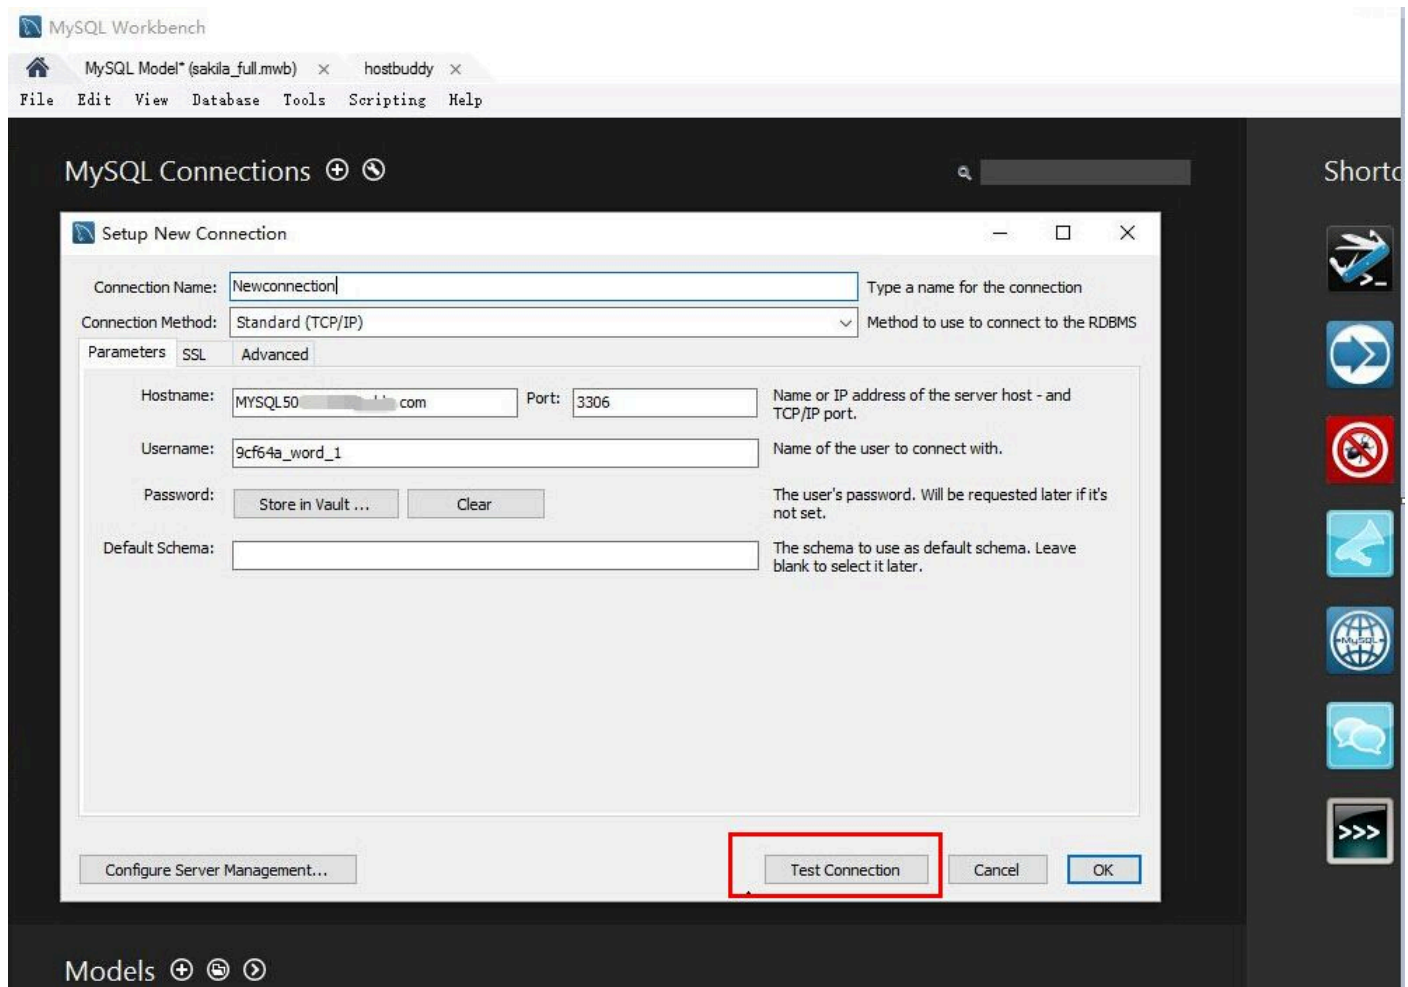

To manage the tables and data in the MySQL database, you will need to obtain a database management system. These instructions are for the popular MySQL Workbench interface.

Download MySQL Workbench from <http://www.mysql.com/downloads/workbench/> and install it on your computer.

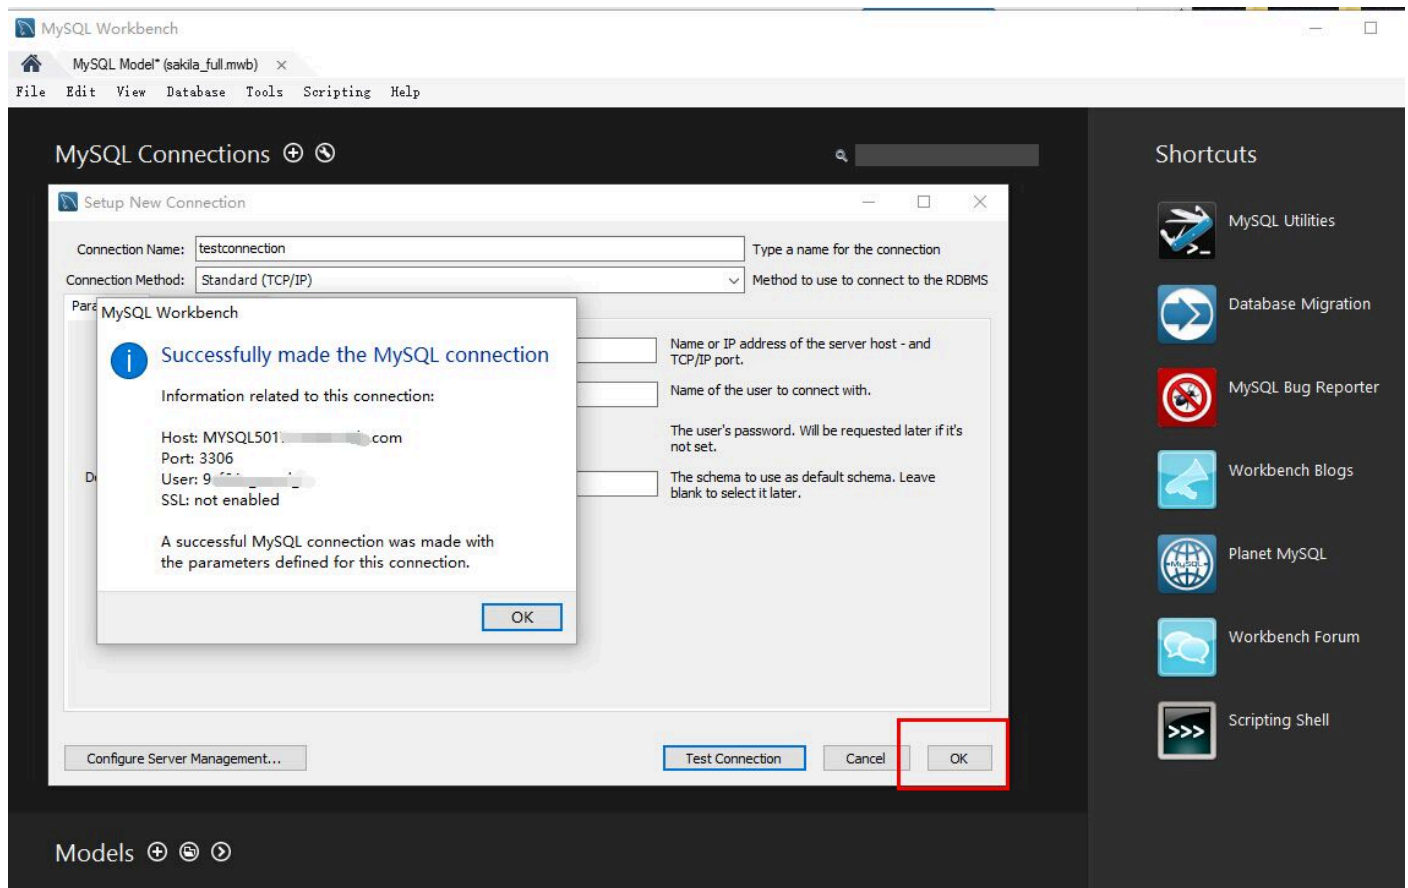

1.Launch MySQL Workbench. You will be presented with the Home window,click **New Connection**.

2.Enter your own Connection Name and the fill in Mysql connection info, click **Test Connection** button to check.

3. You will get successful connection message, click **OK** button to add this new record.

For step-by-step instructions on backing up a database using MySQL Workbench, please see this article.
